Status changes should trigger:

SMS
WhatsApp
Email

automatically.

3. Customers Module

Customer Profile

Name
Phone
Email
Address
District

Business Data:

Total Orders
Total Spend
Last Order
Return Count

Customer Type:

VIP
Regular
New
High Return Risk

Customer History

Show:

All Previous Orders
Delivery Success Rate
Notes

Useful for COD fraud prevention.

4. Product Module

Product List

Columns:

Image
Name
SKU
Category
Stock

Price
Status

Actions:

Edit
Duplicate
Archive
Delete

Product Creation

Fields:

Product Name

Short Description

Pricing:

Cost Price
Selling Price
Discount Price

Inventory:

Stock
SKU
Barcode

Media:

Thumbnail
Gallery Images
Videos

SEO:

Meta Title
Meta Description
Keywords

5. Inventory Module

Track:

Available Stock
Reserved Stock
Sold Stock
Returned Stock

Alerts:

Low Stock
Out of Stock

Bulk Update:

CSV Upload
Excel Upload

6. Courier Management

For:

Steadfast
Pathao
RedX

Features:

Create Consignment

Single Order
Bulk Orders

Tracking Sync

Automatically update:

Picked Up
In Transit
Delivered
Returned

Courier Reports

Delivered
Returned
Pending Pickup

7. Marketing Module

Coupon Management

Create Coupon
Expiry Date
Usage Limit

Campaign Tracking

Track:

Facebook Ads
Google Ads
Organic

Store UTM data.

8. Analytics Module

Sales Dashboard

Revenue
Orders
Average Order Value
Conversion Rate

Product Analytics

Best Sellers
Low Performers

Customer Analytics

Repeat Purchase Rate
Customer Lifetime Value

9. Support Module

Customer Support Tickets:

Open
Pending
Resolved

Order-linked tickets.

10. Finance Module

Track:

Revenue
Courier Charges
Refunds
Returns
Net Profit

Reports:

Daily
Weekly
Monthly

Export:

PDF
Excel
CSV

11. Team Management

Roles:

Super Admin
Admin
Order Manager
Support Agent
Marketing Manager
Inventory Manager

Permissions:

View Orders
Edit Orders
Delete Orders
Manage Products
Manage Finance

12. Settings Module

Store Settings:

Store Name
Logo
Phone
Email
Address

Payment Settings:

COD
bKash
Nagad
Bank

Courier Settings:

API Keys
Webhook URLs

13. Activity Logs

Track everything:

Who changed status
Who edited product
Who deleted order
Who issued refund

This becomes extremely important once you have multiple staff members.

Features I would absolutely include for Gadgets Gram

Bulk Operations

Bulk Confirm Orders
Bulk Courier Submit
Bulk Print Invoices
Bulk Print Labels
Bulk Status Change

Fraud Detection

Flag:

Multiple Returns
Suspicious Phone Numbers
Fake Orders

WhatsApp Integration

One-click:

Confirm Order
Send Tracking
Delivery Update

Printable Documents

Invoice
Packing Slip
Courier Label

Customer Timeline

Order Created
Confirmed
Courier Booked
Delivered

If you're building this from scratch, I would prioritize development in this order:

1. Orders
2. Products
3. Customers
4. Courier Integration
5. Inventory
6. Analytics
7. Marketing
8. Finance
9. Team Management
